

ORACLE®

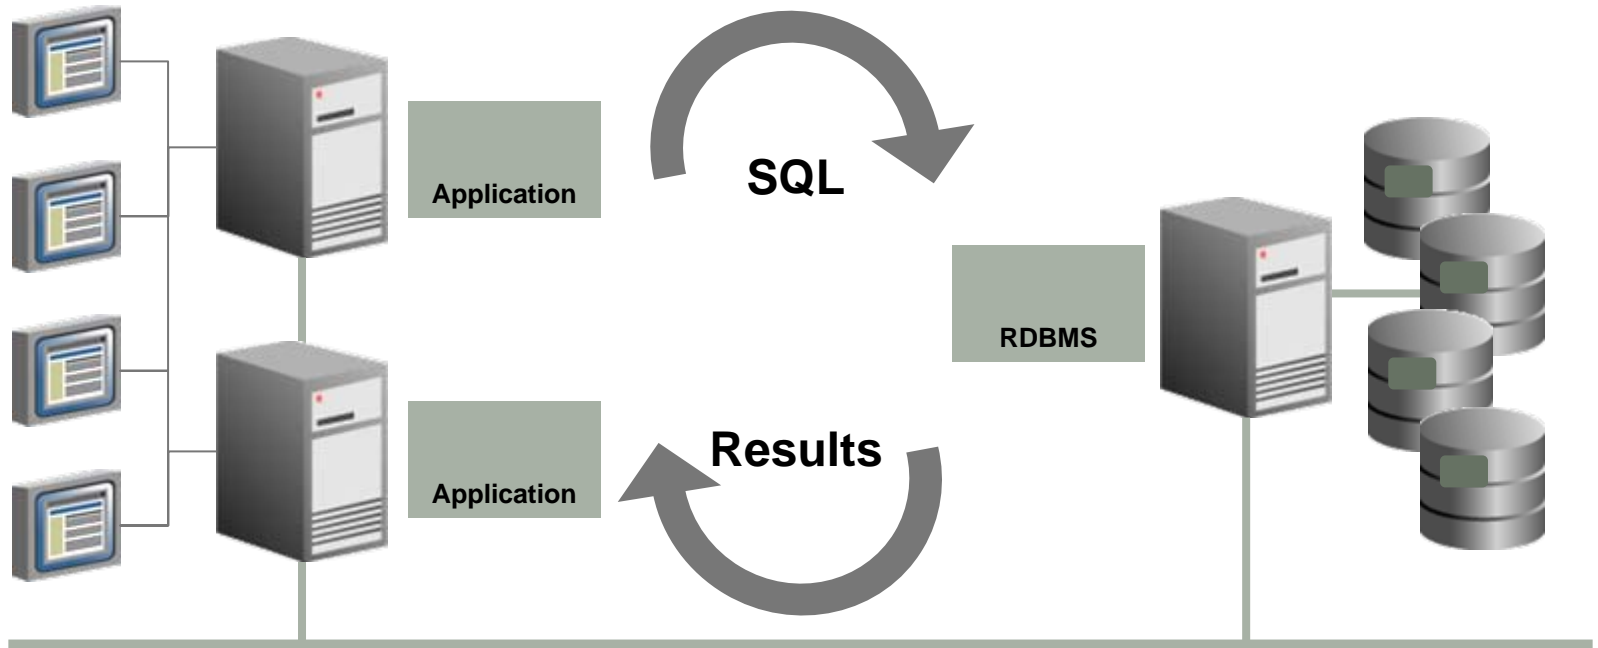

Value of TimesTen

Oracle TimesTen Product Overview

Shig Hiura

Sales Consultant, Oracle Embedded Global Business Unit

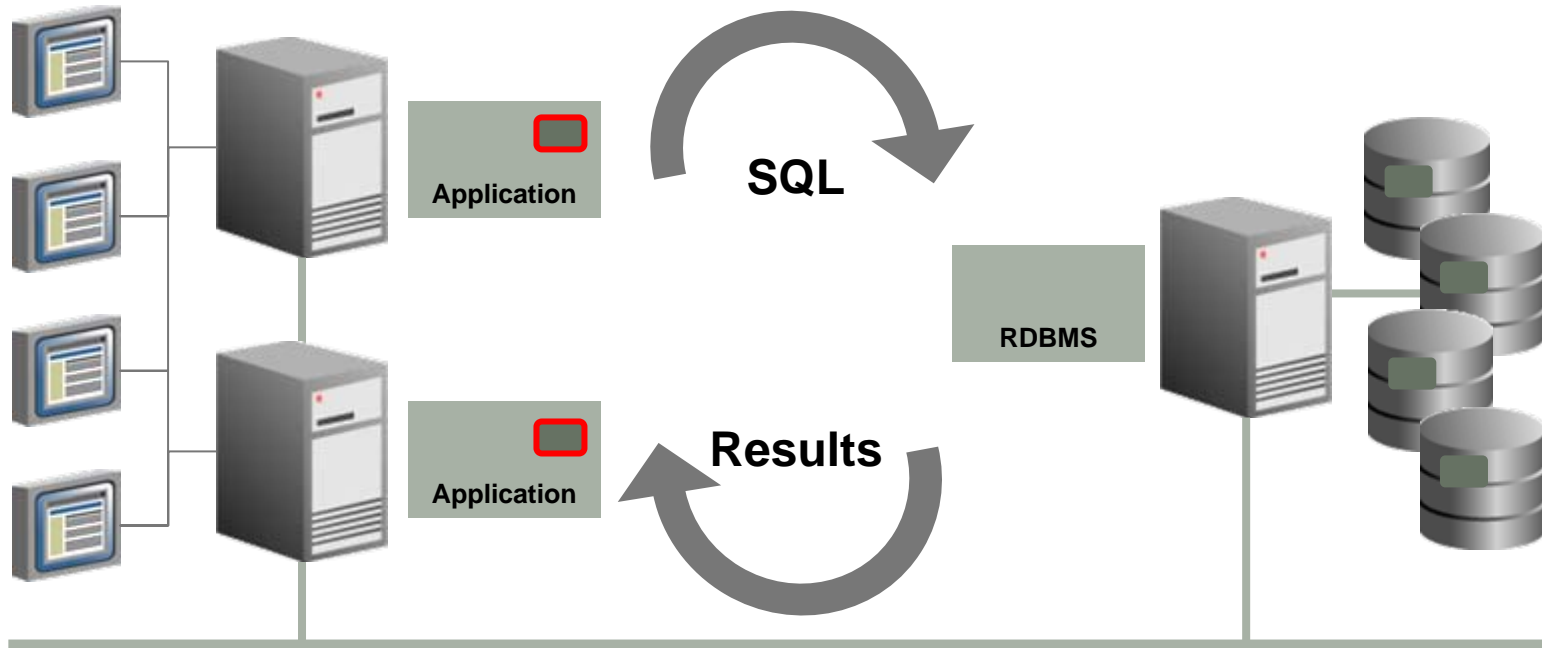

When You Think “Database...”

RDBMS + client/server connectivity

- Data accessed by client application via the network
- Not fast enough for some applications

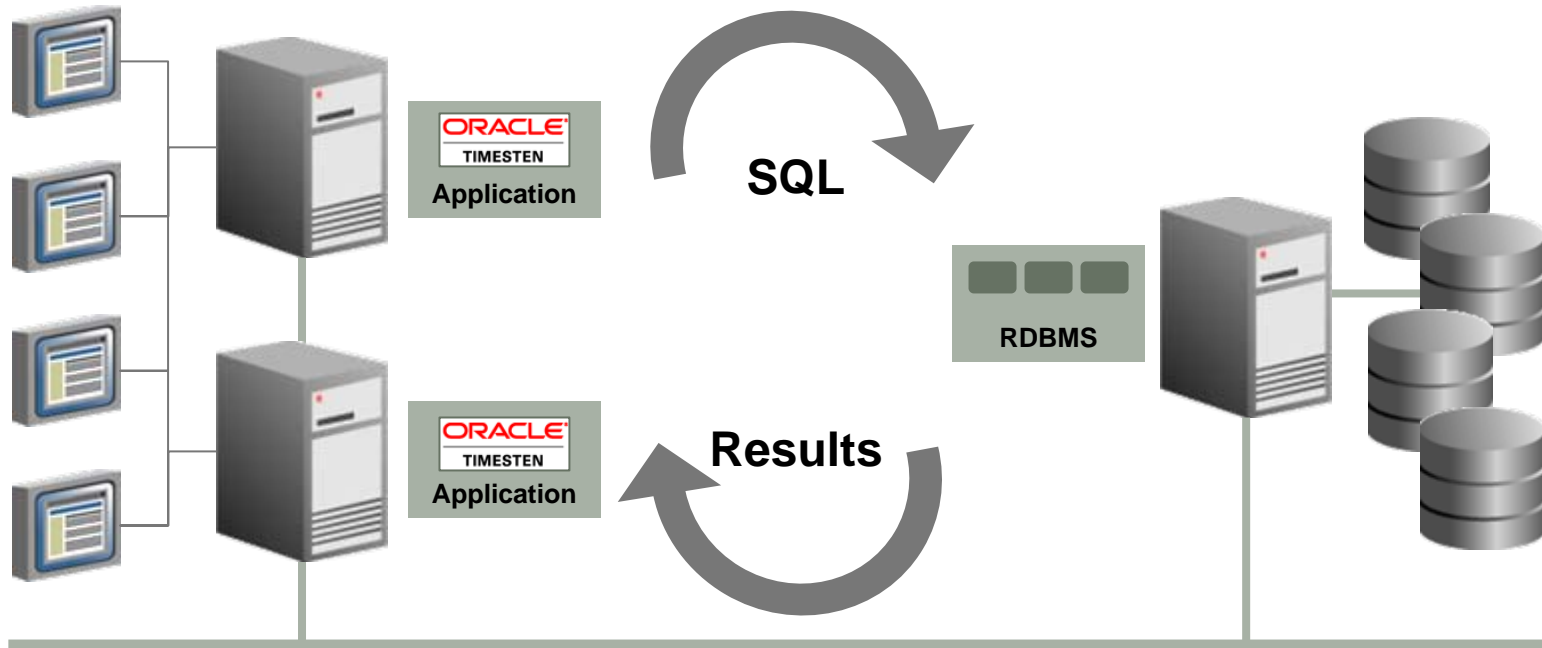

RDBMS with Home-Grown Cache

For very demanding applications:

- Build a home grown, application-specific, in-memory “cache”

One Product: Database + Cache

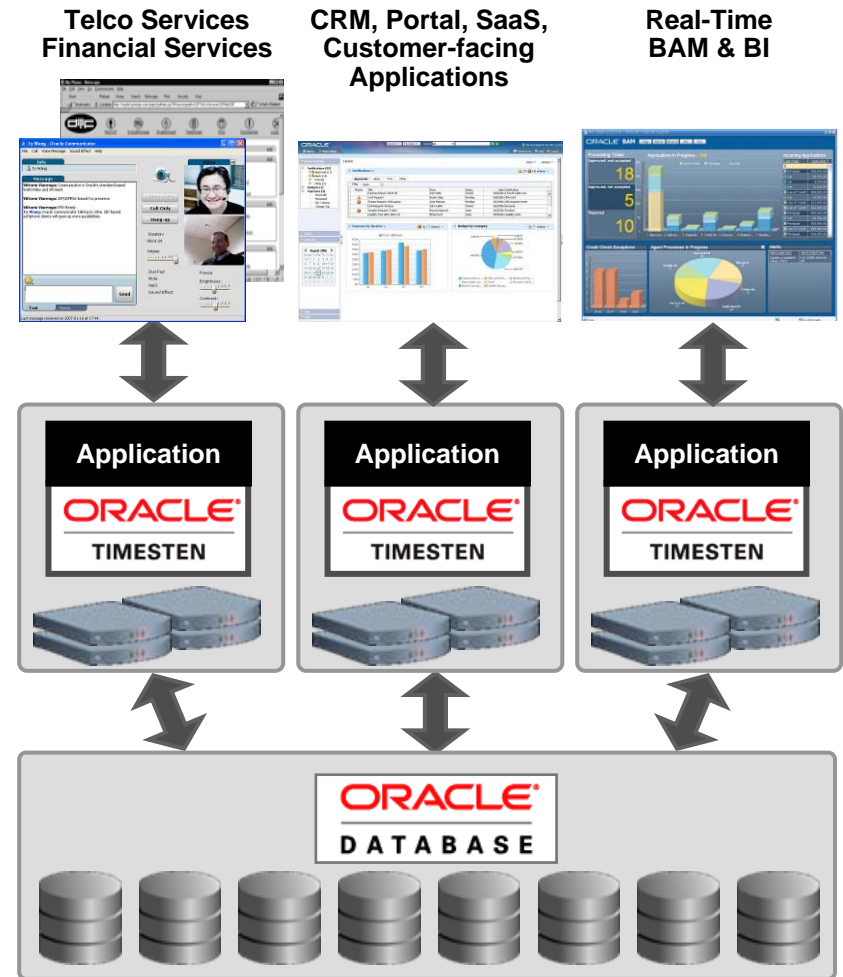

- Full capabilities of relational database
- Standalone or with Oracle
- Memory-optimized speed & latency
- Optimized for embedded architecture
- Persistent, recoverable, highly available

Oracle TimesTen In-Memory Database

Memory-optimized RDBMS for real-time applications

- Application-tier relational database
- Delivers instant responsiveness and very high throughput
- Operates as database of record or as a read/write cache for Oracle Database
- Provides replication for high availability and scalability

“When milliseconds matter”

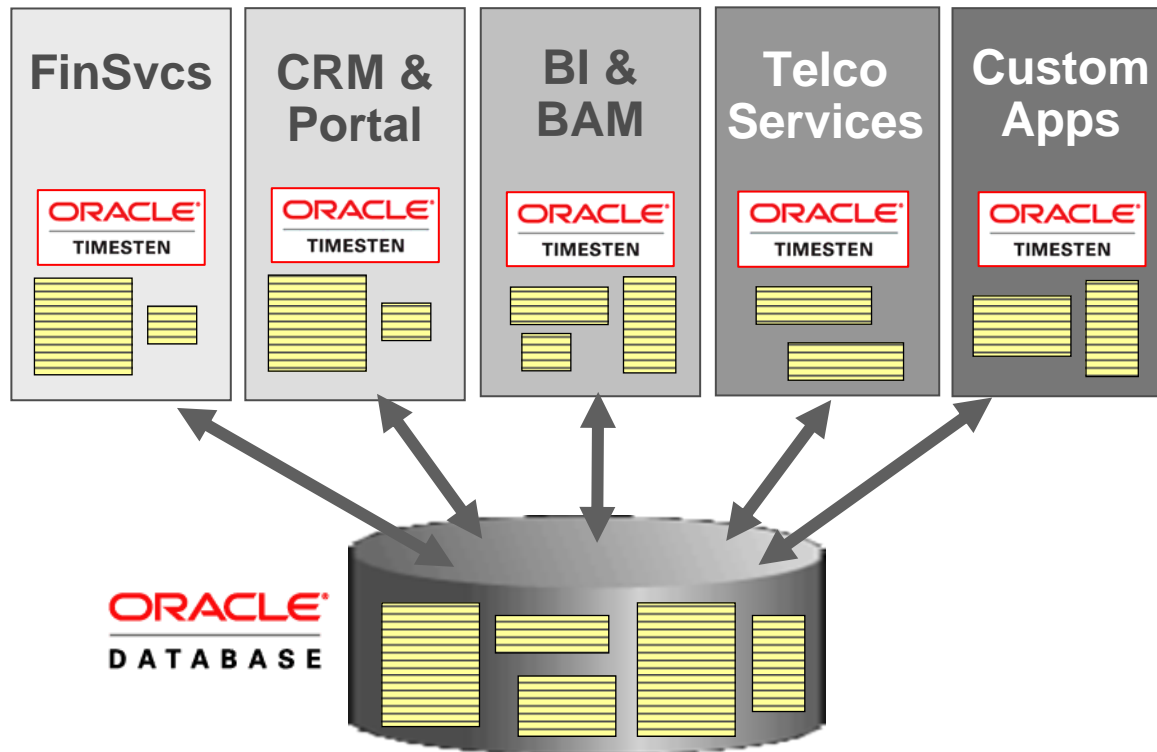

Driving Trends

Enabling the Real-Time Enterprise

- Real-time transactional operations
 - Financial services and trading applications (front-office)
 - Telecom subscriber management and billing applications
 - Defense and intelligence systems – data capture and analysis
- Real-time BAM and BI
 - Data analysis and intelligence “in the transaction path”
 - Position & risk management in financial services
- Real-time CRM and customer care
 - Call center applications
 - Personalization and user profiles
- Real-time SOA
 - Massive increase in data & metadata access
- Real-time sensor-based computing

Oracle TimesTen for Real-Time Business

Extends Oracle Database with real-time data management, to support performance-critical applications

Proven in Real-Time Deployments

Thousands of companies use Oracle TimesTen

Networks

- *Real-time billing*
- *Voice over IP*
- *Mobile Networks*

ERICSSON 

CISCO SYSTEMS

NOKIA

Lucent Technologies
Bell Labs Innovations 

Telecom

- *Value-added Services*
- *Revenue Assurance*
- *Network and QOS Management*
- *Authentication*

T-Mobile

 Sprint.

Oracle TimesTen Products

Product	▶	Oracle TimesTen In-Memory Database
Option	▶	Replication: TimesTen to TimesTen
Option	▶	Cache Connect to Oracle

Oracle TimesTen In-Memory Database

- In-memory RDBMS
 - Entire database in memory
 - Standard access ODBC/JDBC, SQL 92
 - Compatible with Oracle Database
- Exceptional performance
 - Instantaneous response time
 - High throughput
 - Embeddable
- Persistence and durability
 - Database persists to disk
 - Transactions with ACID properties
- Real-time services
 - On-line, non-blocking operations
 - Real-time database change notification
- Near-zero administration

Lightning Fast Response

Oracle TimesTen 6.0
4-CPU, 3 GHz x86 Xeon, 32-bit RHLinux

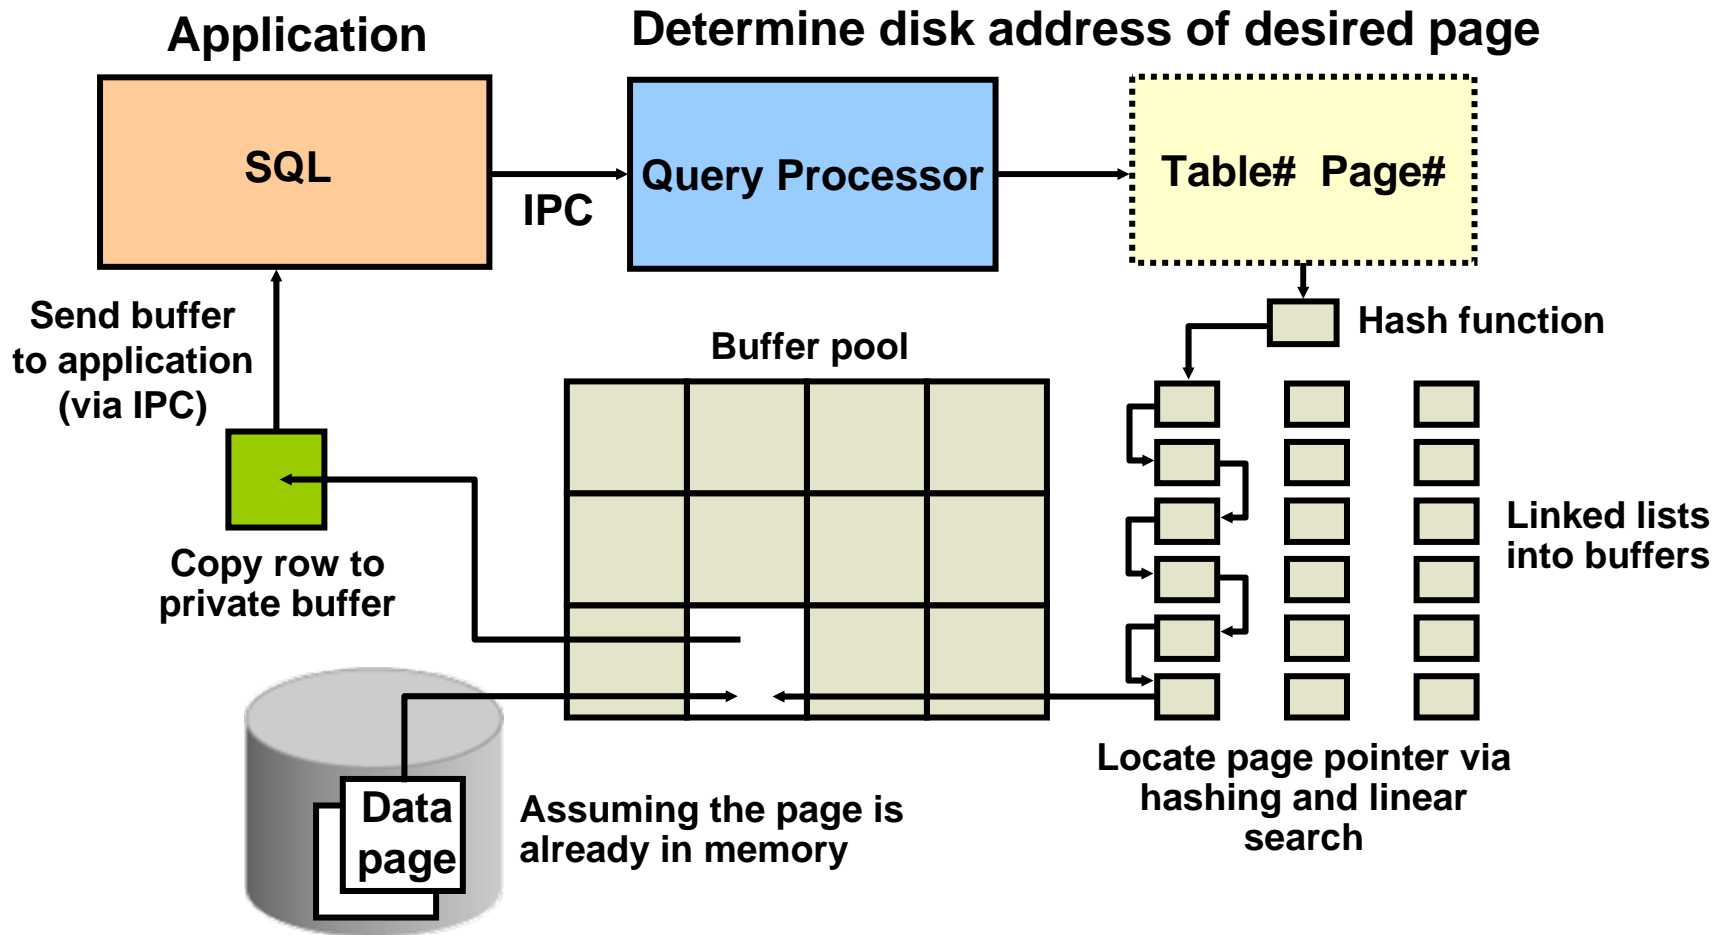

Outstanding Platform Efficiency

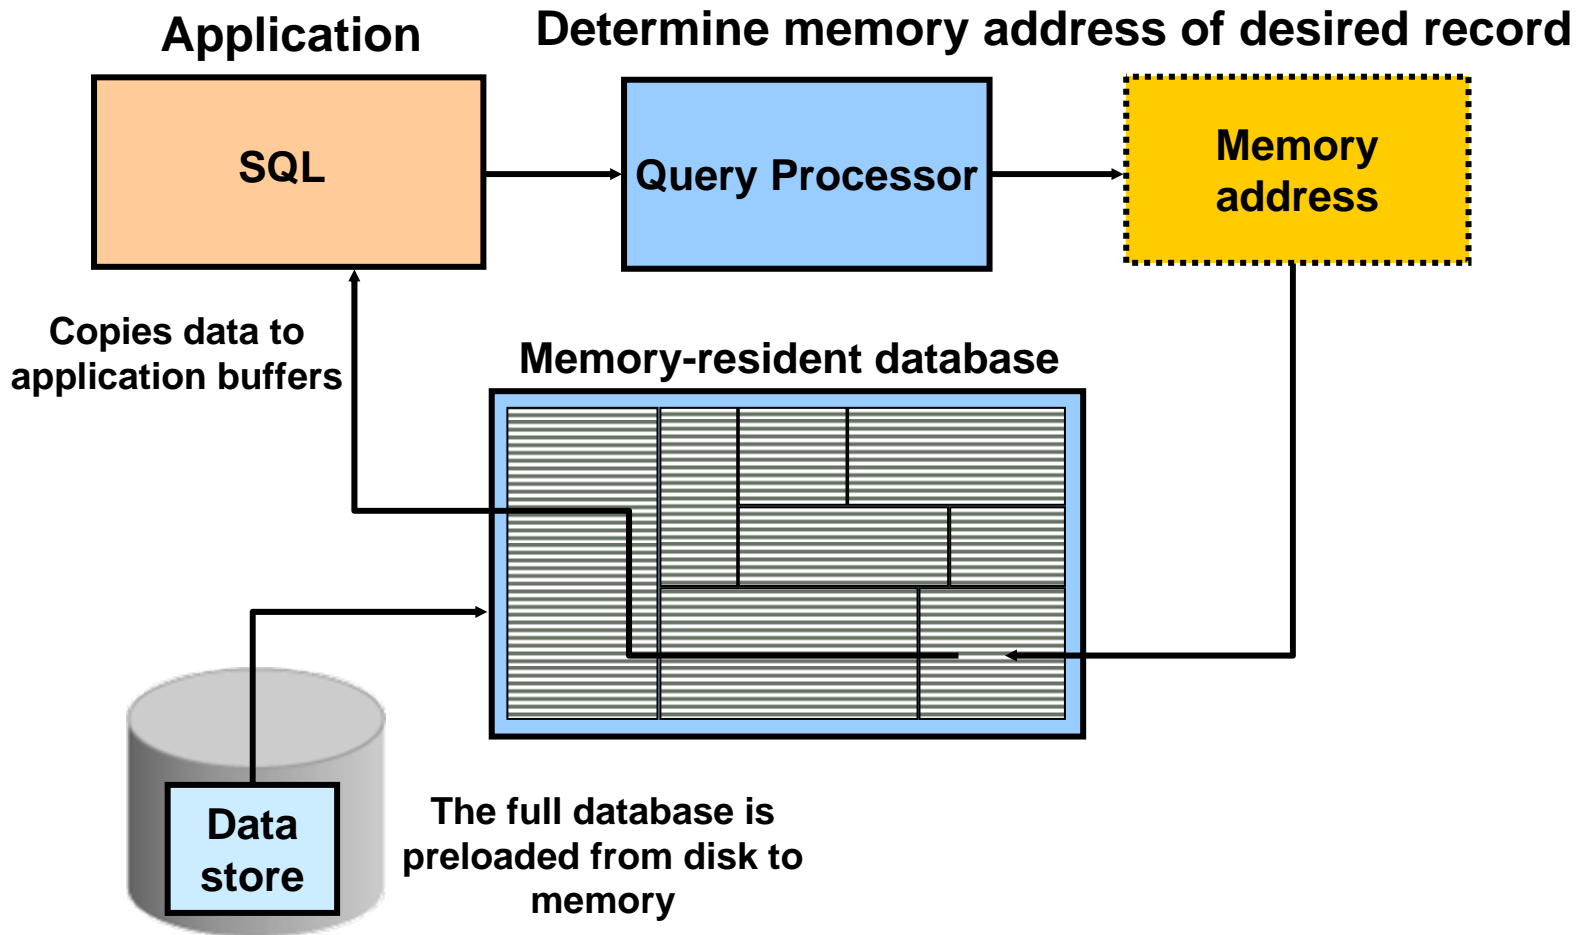

Oracle TimesTen 6.0
4-CPU, 3 GHz x86 Xeon, 32-bit RHLinux

Finding a Row of Data in a Traditional Disk-Optimized RDBMS

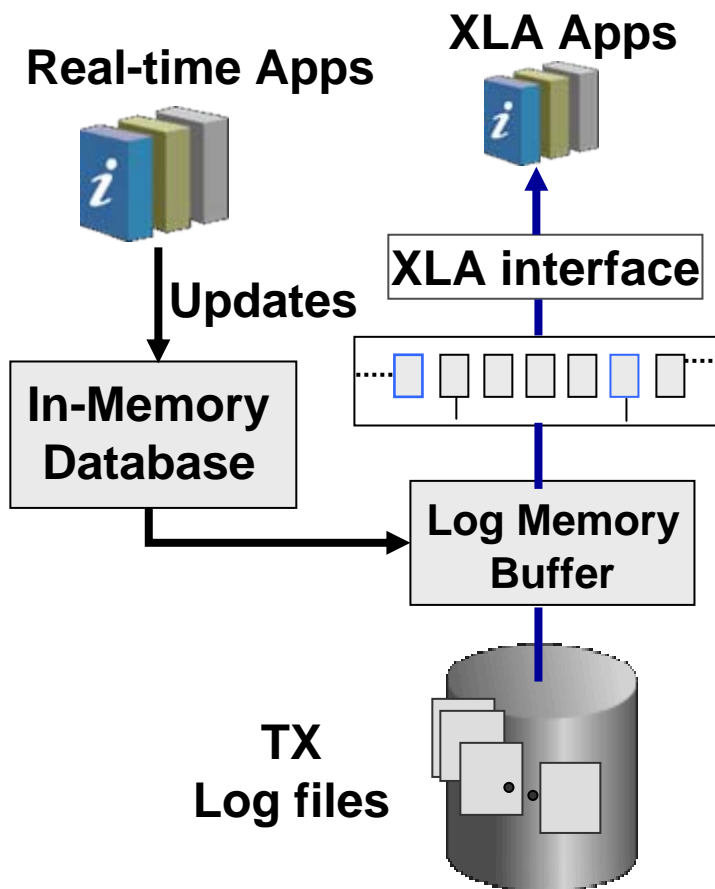

Finding a Row of Data in the TimesTen IMDB

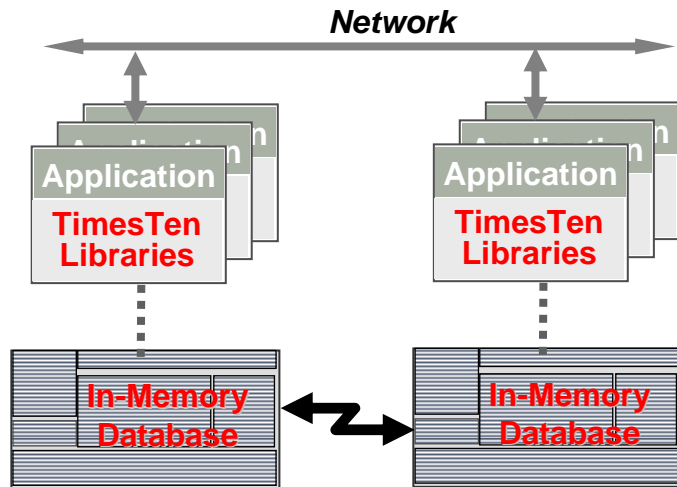

Data Publishing

Transaction Log API (XLA)

- Transaction Log API (XLA)
 - Track real-time data changes
 - Monitor transaction updates
 - Propagate changes to external applications
 - Implement real-time event notification and processing
- Track changes in Tables and Materialized Views
 - Return only committed records from transaction log
- Maintain log positions via *Bookmarks*

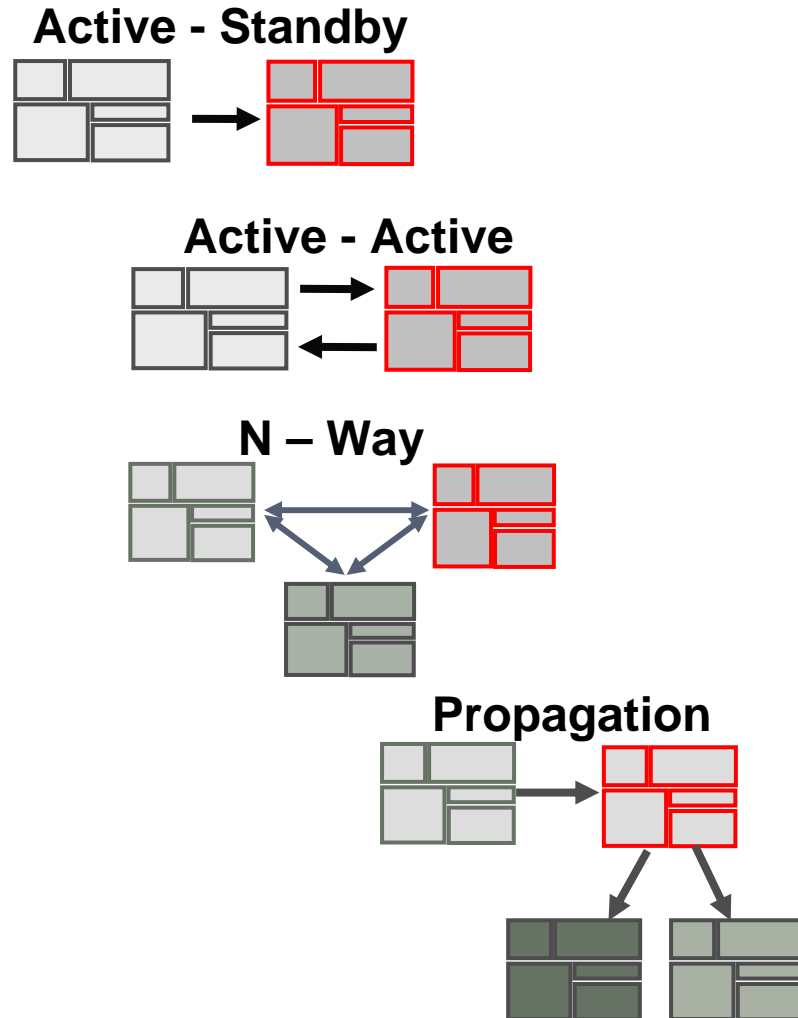

Replication – TimesTen to TimesTen

**Replication
TimesTen to TimesTen**

- Real-time transactional data replication between TimesTen databases
 - Database or tables
 - Configure using SQL
- High performance
 - Asynchronous or Synchronous
- Transparent to the application
 - No application code changes
- Works with Oracle Cache Connect option

Replication – TimesTen to TimesTen

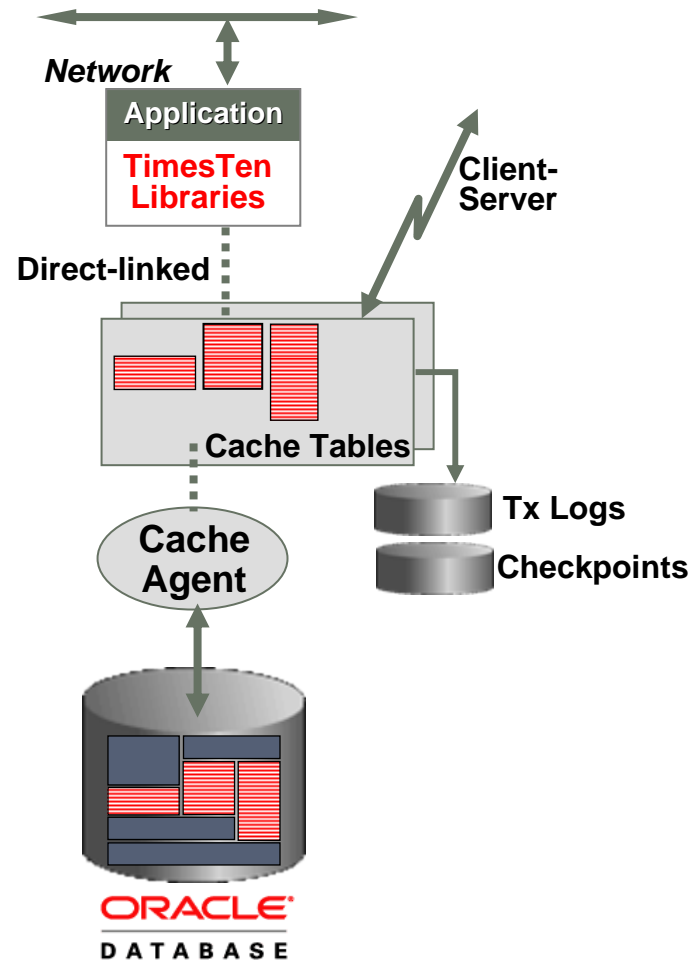

- Flexible configurations
 - Active-standby – most often used
 - Active-active
 - N-way
 - Propagation
- Robust
 - Auto recovery, master catch-up
- Conflict detection & resolution
- Online upgrade – no downtime

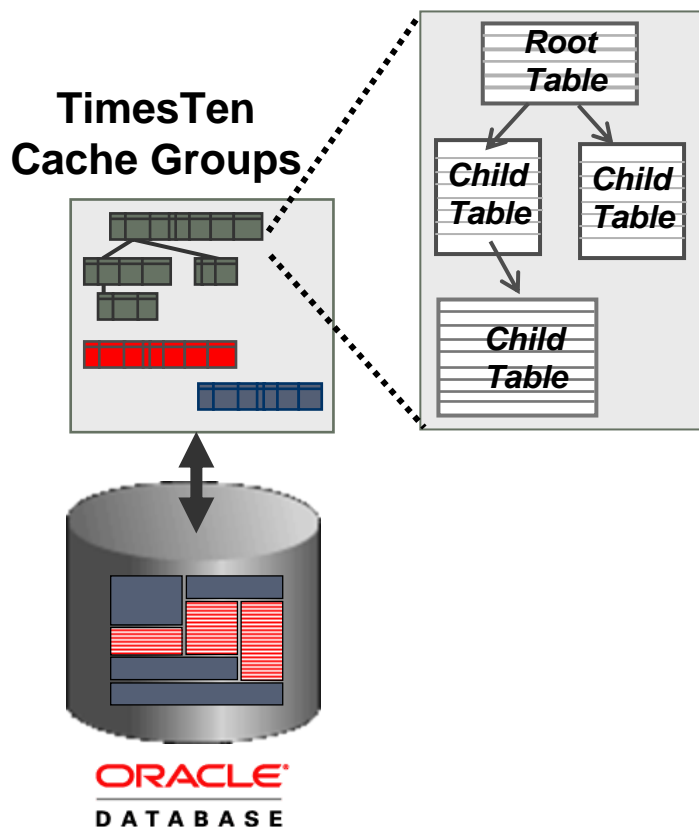

Cache Connect to Oracle

Using Oracle TimesTen to Cache Oracle Data

- Read-only and updatable caches
- Pre-load or load-on-demand the most active data from Oracle
- Bi-directional synchronization
- Works with replication to protect application-tier data
- Keeps working even if the connection to Oracle is down

Cache Connect to Oracle

- Synchronous or Asynchronous
- User configured cache groups
 - Individual and related tables
 - All or subset of rows and columns
- Automatic Synchronization
- Automatic Data Aging
 - Time or LRU based
 - Time window-based caching
- Transparent SQL pass-through for non-cached data requests

Java Middleware Tested with TimesTen

- Oracle Application Server 10.1.2 & 10.1.3
- Oracle BPEL Process Manager 10.1.3
- Oracle TopLink 9.0.4 & 10.1.3
- Oracle JDeveloper 10.1.3
- JBoss Application Server 4
- Hibernate 3
- WebSphere Application Server 6
- Weblogic Application Server 8
- Sun Java System Application Server 8

TimesTen 7.0 Supported Platforms

Platform	Processor
HP-UX 11i and 11i v2	PA-RISC (32-bit and 64-bit)
HP-UX 11i v2	IA64 (32-bit and 64-bit)
HP Tru64	64-bit
IBM AIX 5L 5.2 and 5.3	POWER (32-bit and 64-bit)
Microsoft Windows 2000, Windows XP, Windows 2003 Server	X86 (32-bit and 64-bit)
MontaVista Linux CGE 4.0	X86 (32-bit and 64-bit)
Red Hat Enterprise Linux 3 and 4	X86 (32-bit and 64-bit) Itanium2 (64-bit)
Sun Solaris 8, 9, 10	Sparc (32-bit and 64-bit)
Sun Solaris 10	x86 on AMD Opteron (32-bit*/64-bit)
SUSE Linux Enterprise Server 9, 10	X86 (32-bit and 64-bit) Itanium2 (64-bit)

Oracle Database 10g and TimesTen

Complementary Database Strengths

Database Characteristic	Oracle Database 10g	Oracle TimesTen In-Memory Database
Data Model	Relational – SQL	Relational – SQL
Target Applications	All	OLTP, some DSS
Optimization	Disk-centric	Memory-centric
Typical Deployment	Database Tier	Application Tier
Architecture	Client / Server	Direct Data Access
Response Time	Milliseconds	Microseconds
Data Capacity	Tens of Terabytes	Tens of Gigabytes
Scalability	Unlimited SMP/Cluster	Good SMP

Oracle TimesTen + Oracle Database

End-to-End Data Management

1. Instantly Responsive

2. Tightly Integrated

3. Highly Scalable

Summary

- Oracle offers industry-unique in-memory technology to enable Real-time business
- Proven technology with thousands of deployed customers
- Oracle TimesTen
 - Offers real-time performance for enterprise and embedded applications
 - Provides high availability in the application tier
 - Can run stand-alone as the database of record
 - Extends Oracle Database to improve application performance
 - Provides strong compatibility and interoperability with Oracle Database
 - Offers predictable response-time where microseconds matter!

Oracle TimesTen

Customer Use Cases

Fixed Income Trading System

TimesTen Usage

- Order processing
- Event publishing

TimesTen Values

- Fast order execution
- Trader alerting

Fast, On-Target Customer Service

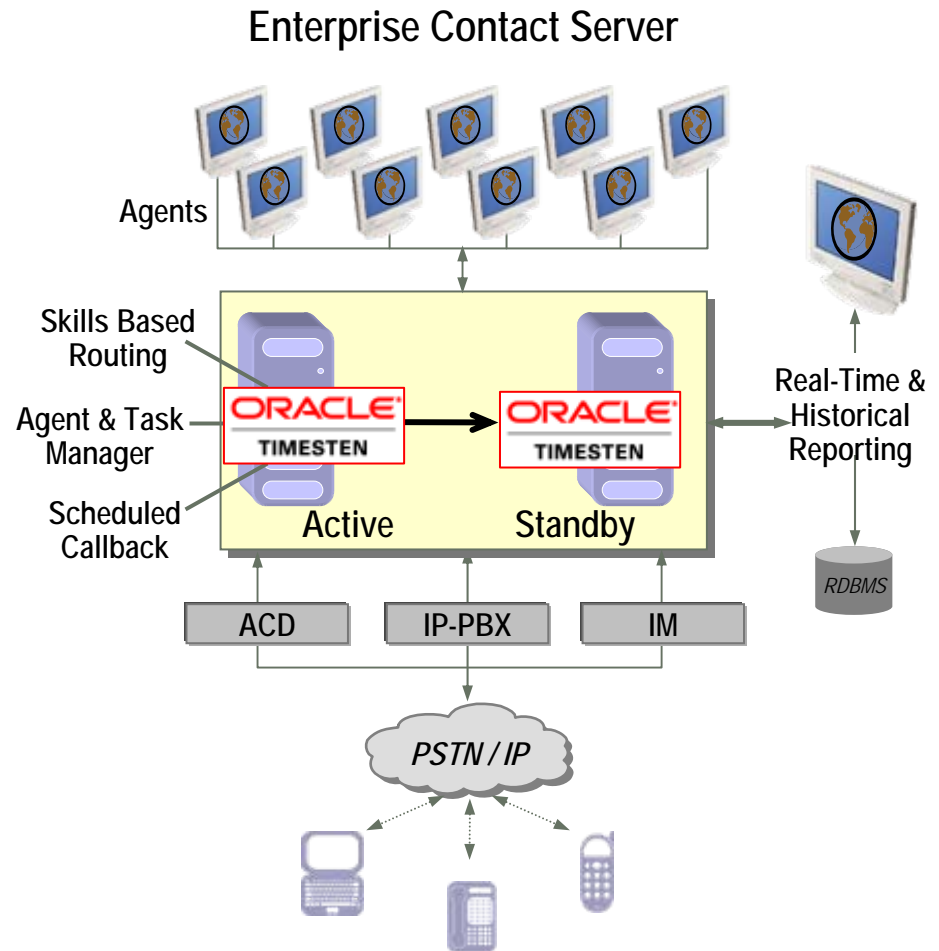

Leading Call Center Solution Vendor

TimesTen Usage

- Reference data lookups
- Routing calls to agents
- State management (case & agent status)
- Real-time reporting (call center monitoring)

TimesTen Values

- Instant, accurate matches
- High throughput per server
- High availability
