

NYOUG Training Day Registration Form

Writing Optimal SQL with Jonathan Lewis

Full-day seminar

sponsored by New York Oracle Users Group (NYOUG)

Jonathan Lewis is a well-known name in the Oracle world. Currently an Oracle ACE Director, and chosen as the Oracle Author of the Year 2006 for his book *Cost Based Oracle – Fundamentals* (Apress, 2005). Jonathan has been using the Oracle database software for more than 21 years. Jonathan spends a large fraction of his time trouble shooting high-performance systems - a job that often requires a very detailed investigation of some of the internal mechanisms. The time he doesn't spend on trouble-shooting is then devoted to further investigation, writing, and teaching on the way that Oracle works.

When: Wednesday May 19, 2010 9:00AM – 5:00PM

Where: St. John's University, 101 Murray Street, New York, NY 10007-2132
